

## Kevin McGrew

### Conflict of Interest Disclosure Statement (10-14-24)

I, Kevin McGrew, am an active scholar who publishes articles, book chapters and books. I also speak at state, national, and international conferences. I also am the blogmaster for three professional blogs. As per the nature of scholarship and writing, one's research and writing often overlaps with specific commercial or monetary interests in the same fields. To be transparent, below are the potential conflicts of interest I feel ethically compelled to disclose. Detailed information can be available at the following link:

<http://themindhub.com/about-iap>

- I am a coauthor of the Woodcock-Johnson III Battery (WJ III), the Woodcock-Johnson IV Battery (WJ IV), and the Woodcock-Munoz Battery III and IV. I have a financial (royalty) interest in these psychological instruments.
- I am the senior author on the Woodcock-Johnson V (WJ V; projected launch data Q1 2025). I will have already received monetary compensation for my work. I will *not* receive any direct royalty income from the publisher once the WJ V is published.
- I was the primary statistical and psychometric expert for the development of the first edition of Children's Psychological Processes Scale (CPPS), for which I have a financial (royalty) interest.
- I am the Director and primary owner of the Institute for Applied Psychometrics llc (IAP).
- All my blog writing is part of my role as the Director of the Institute of Applied Psychometrics (<http://www.iapsych.com>).
- IAP is the mechanism via which I do all my work related to the WJ III, WJ IV, WJ V, BAT III and BAT-IV, and any future related products.
- I have served as a paid external scientific advisor for a neurotechnology company (Interactive Metronome) that produces commercial neurotechnology products and services. I may receive consulting fees for special projects completed upon the request of IM.
- I have served as a paid External Research Consultant to the Instituto Ayrton Senna-eduLab21 for a project focused on developing a model of motivated self-regulated learning in the context of ASI's SENNA social-emotional skills project (August 2020 to current).
- Unless otherwise specified, all my professional writing, research and consultation reflect my opinions and are not necessarily those of: (a) the coauthors of the WJ III, WJ IV, WJ V, BAT III, BAT IV, (b) Riverside Insights (publisher of the above listed tests), (c) Interactive Metronome, or (d) other organizations where I may provide consultant services.
- Any expert consultation I provide about *Atkins* intellectual disability (ID) death penalty cases are part of my role as Director of IAP.
